

PSYCHEDELICARE.EU

THE CITIZENS' INITIATIVE FOR THE MIND

THE INITIATIVE - REQUESTS

Our requests to the European Commission

- 1** Support the establishment of a group of professional and patient representatives consensus on standards of psychedelic care allowing the phased roll-out of the therapeutical use of psychedelics in the European Union.
- 2** Boost EU-funded research into the promising therapeutic applications of psychedelic compounds to meaningfully increase scientific and clinical evidence on the safety and efficacy of psychedelic novel treatments.
- 3** Coordinate the work of Member States willing to **make appropriate recommendations to the 1971 Convention on Psychotropic Substances**, as the evidence indicates a public health benefit for rescheduling those compounds.

THE INITIATIVE - PURPOSES

What we are aiming for:

**Inform about
the benefits
of psychedelics
for mental health**

**Promote debates
on psychedelics,
mental health
and drug policy reform**

**Improve
mental health
in the European
Union**

About us

We are scientists, medical doctors, therapists, neuroscience researchers, creative and marketing professionals, artists, policy experts, human and civil rights activists, spiritual practitioners and educators, together, **united behind science and knowledge of EU laws.**

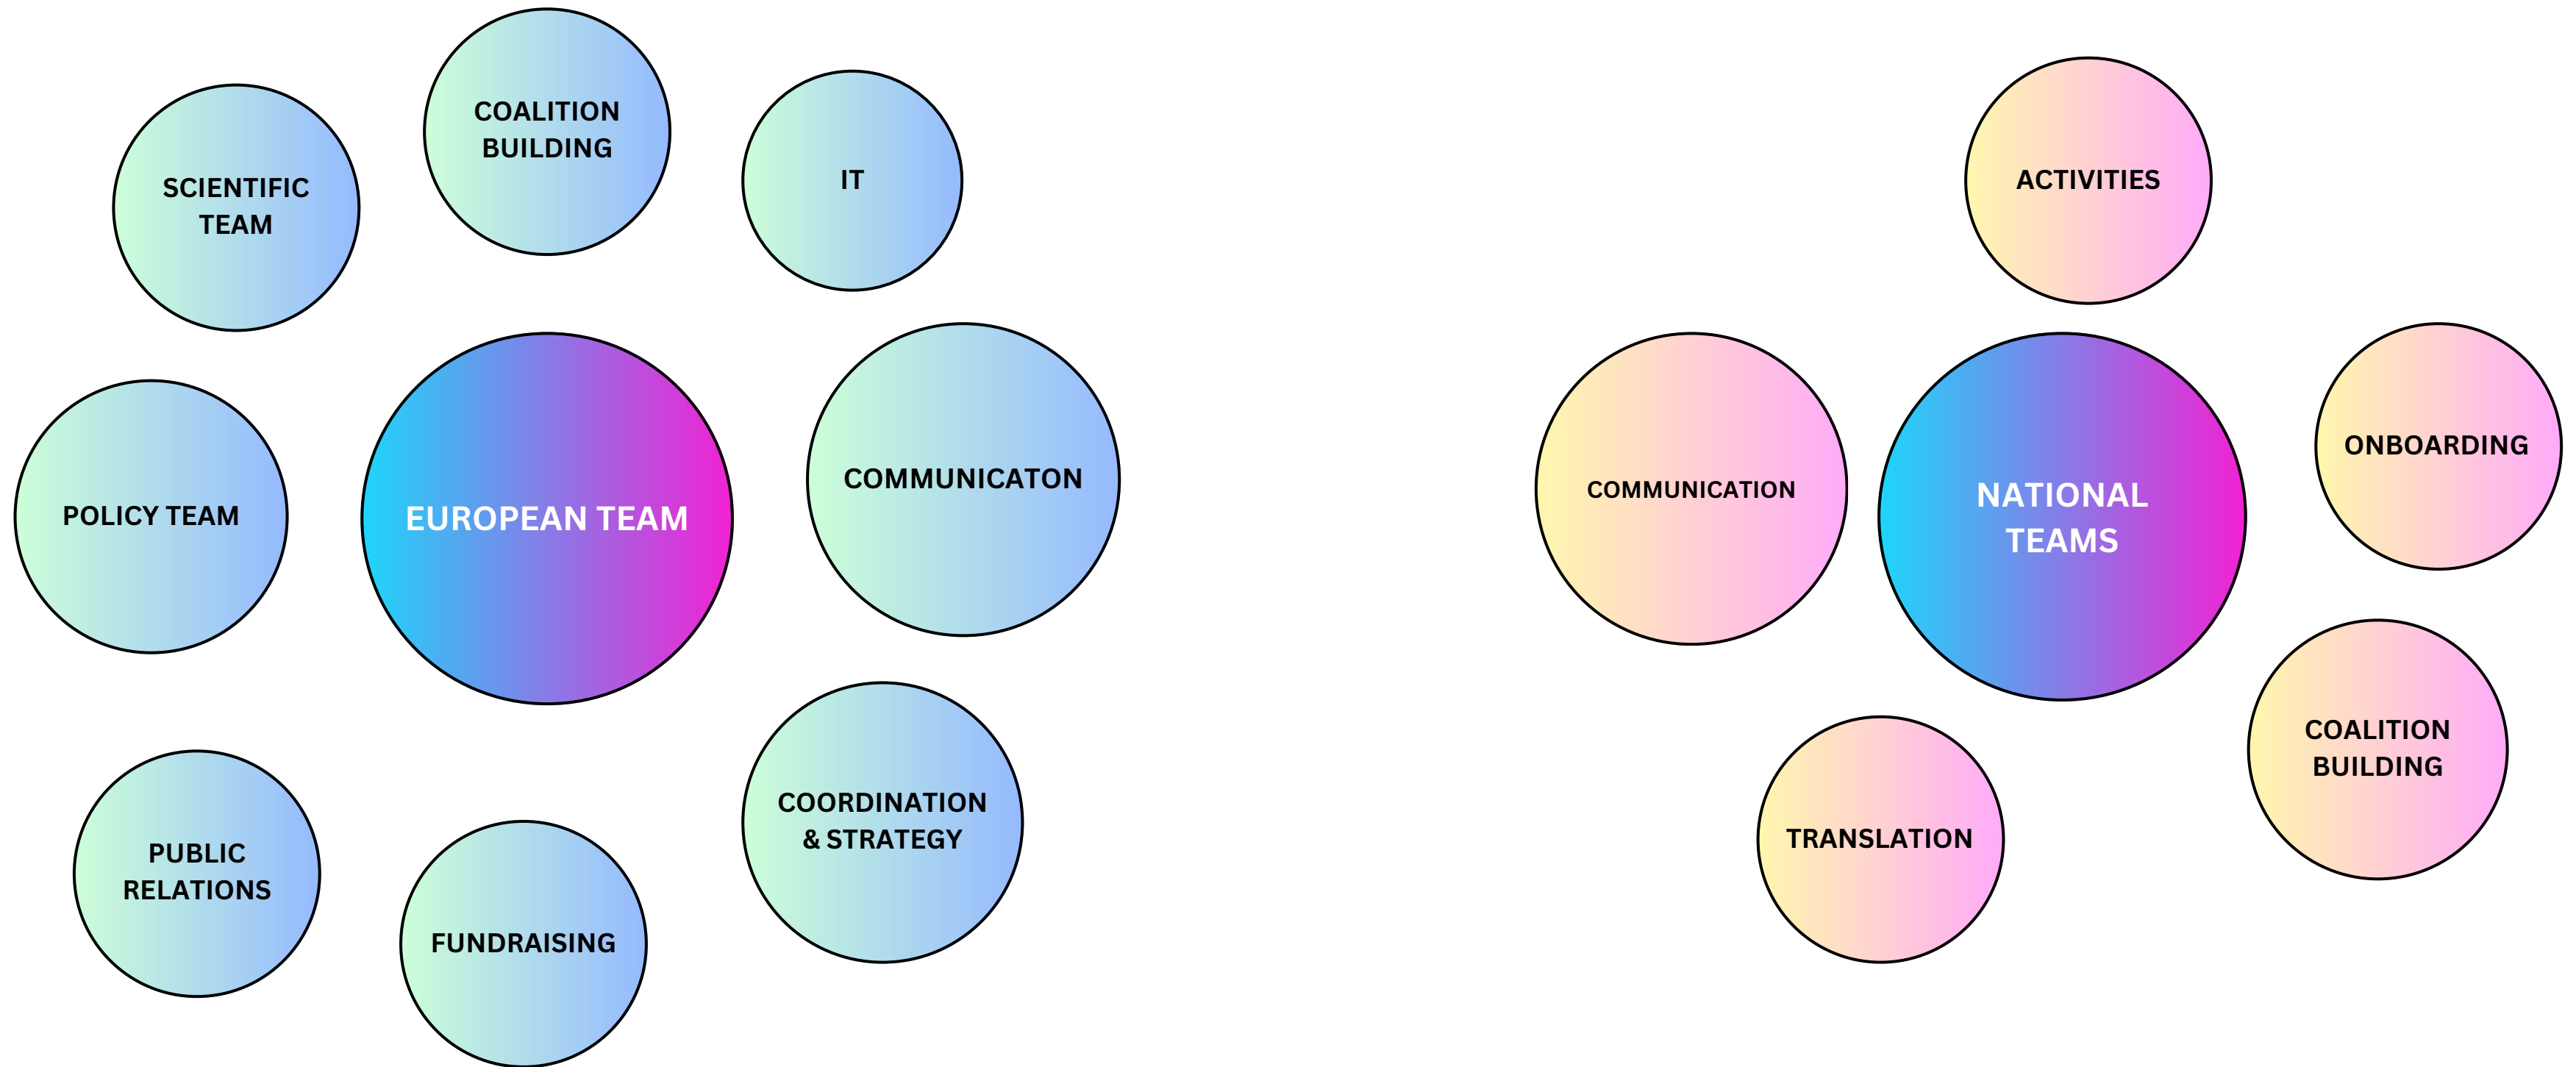

The PsychedeliCare Initiative currently involves **participants from over 20 countries**, who believe in nature, science and people power to make a positive change, **to embark on this panEuropean democratic healing process.**
