Hello Arkady! How are you?
Fine and you?
Fine! What are you doing here? I didn’t think to see you!
I have an appointment in 5 minutes. How was your journey in Europe?
Oh! It wasn’t so good!
Why? What happened?
There was a big problem! I couldn’t drive where I wanted.
That’s because there were too many environmental areas. My car is ecological enough but i can’t drive into the city center because I don’t have any environmental label.
Why haven’t you bought some?
Because I didn’t know that it was needed. When I understood that, it was too late to order it. Moreover, one environmental label isn’t so expensive, but if I must buy 3 or 4 environmental labels...
It can become very expensive. You are right. This system isn’t very good! Oh, I have an idea!
What is it?
We can create environmental labels for all Europe and afterwards we can send our project to the EU.
It is a really good idea!
Oh! I’m late! I have to go! I call you to know when we do that! Bye!
Bye!

Some days later...
That’s it! It’s finished!
Yes! And I think that it is really good because we have created the 6 environmental labels following the EU criteria.
Yes, you’re right! Here we have the names of the labels.
And here there is the registration of the car.
It’s perfect! Now we have only to get signatures and send it to the EU. Oh! I have to go, but we stay in touch!
Yes, of course! See you!
See you!
